

Software Engineer

U.S. Citizenship Required.

We are currently seeking an energetic, innovative and experienced Software Engineer to join a fast growing company that develops a wide range of unique customer software solutions. We offer complex engineering challenges, a top-notch work environment, and an experienced team of engineers to collaborate with.

ROLE

We have an immediate opening for a Software Engineer focused on evolving and enhancing our core products and solutions.

RESPONSIBILITIES

As a software engineer, your responsibilities encompass a wide range of activities:

- Staying abreast of new and upcoming technologies
- Understanding how to apply new technologies in novel ways to solve complex problems
- Adhering to an Agile process
- Leading technical discussions

In addition, you will oversee code reviews, mentor younger developers, and assist with designing software architecture.

REQUIRED

Qualified candidates must possess the following:

- BS, MS, in Computer Science or Software Engineering or equivalent experience
- Possess an extremely sound understanding in the basic areas of Computer Science such as Algorithms, Data Structures, Object Oriented Design, Databases
- Experience with software engineering best practices (e.g. testing, code reviews, design documentation)
- Design and architecture knowledge as well as familiarity with object oriented analysis and design patterns (OOA/OOD)
- Working knowledge of API design and distributed backend systems
- Ability to clearly and concisely communicate with technical and non-technical stakeholders across all levels of the organization

PREFERRED

- 5+ years experience building software solutions in an enterprise or start-up engineering environment using Python, JavaScript, Java, or C++.
- Experience serving in a technical leadership role
- 2+ years experience developing web applications. Medium-to-large, multi-tiered web applications
- Understanding of web services technologies such as REST, HTTP, WSDL, XSD, and SOAP,
- Familiar with modern JavaScript frameworks (Angular, React, Ember, etc.)
- Knowledge of cross platform/ browser compatibility issues for dynamic web applications
- Hands-on networking experience
- Substantive experience in building innovative and complex software.
- Experience developing rich software applications and single page applications using RESTful services, AJAX, JSON, CORS, and/or WebSockets
- Experience designing/building front end web software with HTML, CSS, Javascript, and general web development techniques
- Experience working in a UNIX/Linux environment is preferred
- Experience working in an Agile development environment

Benefits:

- The best computers with at least two large monitors;
- Windows, OSX, or Linux machine – your choice;
- Generous salary, holidays, vacation, plus personal leave;
- Fully-paid employee health and dental plans and life insurance;
- Private or semi-private window offices;
- Comfortable, contemporary furnishings;
- 401k plan w/company match that vests immediately;
- Tuition/educational assistance program;
- Casual dress and flexible schedule;
- Free snacks, Starbucks coffee, and other beverages;
- Regular free lunches and social events (plus the summer picnic, and winter holiday party);
- Convenient location - bike or walk to work (showers and gym in the facility).

We are proud to be an Equal Opportunity Employer and do not discriminate on the basis of race, religion, gender, national origin, color, age, military service eligibility or veteran status, disability, sexual orientation, gender identity, marital status or any other protected class. We encourage and support workplace diversity.

Qualified candidates should submit their resumes in MS Word or PDF format. No third parties, no agencies, no subcontractors need apply.
